

Teguh Ilham Saputra

Bandung, Indonesia | teguh4930@gmail.com | [LinkedIn](#)

I am a Computer Science student at Binus University with current eager field in cloud and network operations with hands-on experience in Proxmox VE, hybrid cloud architectures, AWS, and Google Cloud Platform. Experienced in developing CRUD applications and deploying services across hybrid and cross-cloud environments; focused on automating infrastructure, optimizing network routing, and enabling secure remote access to improve system reliability.

Areas of Expertise

- **Cloud & Virtualization:** Proxmox VE (Hypervisor), Hybrid Cloud Architecture, AWS, Google Cloud Platform
- **Network:** VPC Management, Cloud Routing, Secure Remote Access

Education

Computer Science, Bina Nusantara University
GPA: 3.45

Sept 2024 - Present

Skills

Programming language: C++, C, Java, PHP, Kotlin
Database: MySQL, PostgreSQL
Framework: Laravel, NextJs

Experiences

AWS re/START

Present

Participating in the AWS re/START program to bridge my on-premise networking knowledge (VPC, Cloud Routing, virtualization) into the AWS ecosystem. Focusing on core cloud architecture, automation, and security best practices to prepare for my next role in Cloud/DevOps.

Certifications

[Google Cloud Computing Foundations Certificate](#)

Present
